To be successful, organizations must be leaner, faster and more competitive than ever. Time is a most precious and perishable commodity.

Who We Are

Amy Zimmerman & Associates is a dynamic team of placement professionals dedicated to saving time for clients by providing skilled and motivated candidates to meet their precise needs.

Our personnel placement services focus on regular, full-time and temporary positions that are vital to the smooth operation of any organization, which often must be filled on virtually a moment's notice.

How We Help You

Every client request is treated with urgency, selectivity and confidentiality. We attribute our high rate of successful placements to our personal, hands-on approach and presenting only the best candidates for client consideration.

We build client relationships on communication and trust, investing our time to learn about your business. We review your specific business and human resource requirements. With every assignment from you we create a complete job description for each open position. Then we compile a detailed candidate profile that includes the skills, personality traits and attitudes necessary to fill that position. All candidates are evaluated, tested and thoroughly screened before they are sent to you for an interview.

Amy Zimmerman & Associates has built its reputation on years of hard work, trust and going that extra mile to get the right match.

There are no shortcuts to long-term placements—and no substitute for quality and integrity.

You have a **new client** who needs a **big job** completed by the end of the week.

Your administrative assistant is **out with the flu** and year-end reports are due...

Your accounts payables clerk goes on **family leave** during year-end closing...

Temporary Services

Whether you need temporary support for 4 hours or 4 months, we have high quality, dependable employees that are ready to work for you immediately.

Each employee is interviewed personally and thoroughly screened through skill tests and reference checks. A thorough job analysis is conducted for accurate matching of temporary to assignment.

We have trained employees and offer free training and testing for our customers, in all up-to-date software programs.

Complete client satisfaction is our objective. We will get back to you in less than 30 minutes. We want to fill your order right the first time, every time.
